

CAFE TRACK

ACCESS

CAFE TRACK is in a Grade 2 Listed Building, this means our toilets are downstairs. We have a series of photos on the next page to show you what CAFE TRACK looks like.

SOUNDS

Our Coffee Machine can make loud noises, but staff will say "Coffee Machine going on". Ear Defenders are welcome at all times. We have a vent which is on to ensure the CAFE does not become full of smoke. Music will be played quietly at times, this will be advertised so that you can avoid those time if you'd prefer.

QUIET AREA

We have an area downstairs which is a space for people who may wish to spend an amount of time away from the upstairs cafe. We would like to know what else you would like in this area.

COMMUNI CATION

If you would rather not communicate verbally that is fine. In the new year we will be operating a text order service, or alternatively you can email us your order. Please don't feel you have to make eye contact.

We welcome your feedback and would love to know how we can adapt the environment to make it more welcoming. Please email thomas@track.org.uk with your ideas.

CAFE TRACK

This is our main seating area. The Coffee machine can be loud, but we will let you know when the machine is going on. Tables can be arranged into groups if needed

Our menu is displayed on the wall, but we also have menu's on each table. We have prepared a menu which has more visual images on it, and this is online so you can look before you visit.

We welcome your feedback and would love to know how we can adapt the environment to make it more welcoming. Please email thomas@track.org.uk with your ideas.

CAFE TRACK

You can order at the counter, but if you would prefer you can order via email (and in the New Year a text service will be available). If you would rather communicate via writing this is fine, and if we can support in any way please do let us know

These are the stairs which lead to our quiet Area and toilets. The Term M'Duck is an affectionate term which people in Northamptonshire use (similar to "mate").

The height to the ceiling is smaller than the rest of the building, so you need to be careful to ensure you do not bump your head

We welcome your feedback and would love to know how we can adapt the environment to make it more welcoming. Please email thomas@track.org.uk with your ideas.

CAFE TRACK

This is our quiet area, if you wish to take some time away from the upstairs cafe. There are a range of textures in this area and you can control the lighting in this area as well. We want to show businesses that they can transform spaces, to make places more welcoming

We have two toilet cubicles downstairs. At this current moment in time we have halogen style light bulbs (left from the previous owner). We are aware these can cause discomfort and will be looking to change this early in the new year (we have removed one already)

EVENTS

We will be hosting a range of events, including the opportunity for "A quiet meal out" where you will also be able to pre-order food and it will be ready on your arrival

We welcome your feedback and would love to know how we can adapt the environment to make it more welcoming. Please email thomas@track.org.uk with your ideas.
